

TAPASYA SHRESTHA

tapasyashrestha9@gmail.com | 8077559884 | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript, SQL, HTML, CSS

Frontend & UI: React, TypeScript, Tailwind CSS, Vite, React Router, Responsive Design

Backend & APIs: FastAPI, Firebase (Auth, Firestore, Storage), REST APIs

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Streamlit

Databases & Tools: PostgreSQL, MySQL, Firestore, Git, GitHub

EXPERIENCE

AI-ML Intern — SKILLiGENCE EdTech Pvt. Ltd.

May 2026 – Jul 2026

- Selected as AI-ML Intern to design and build AI/ML projects for the company over the internship period.
- Delivered multiple production-ready packages and source code submissions in line with internship deliverables.
- Completed the internship successfully and received an Internship Appreciation Letter and Certificate of Appreciation.

PROJECTS

Vakeel – Multi-Tenant Legal Tech Platform for Indian Advocate Chambers | [GitHub](#)

Firestore Auth, Firestore, Firebase Storage, FastAPI, React, OpenAI Embeddings, Indian Kanoon API

- Designing a B2B legal tech platform enabling advocate chambers to manage drafting, case research, and document workflows with verified, source-traceable outputs rather than raw generative speed.
- Architected a multi-tenant system using Firestore custom claims and Firestore path-based collection structure, with security rules enforcing strict per-chamber data isolation.
- Built a Retrieval-Augmented Generation (RAG) pipeline separating the public Indian Kanoon case-law corpus from private chamber document embeddings, ensuring no cross-tenant leakage.
- Defined core product systems spanning a Unified Retrieval Engine, Drafting Layer, Document Handling, Chamber Activity Layer, and a human-entered Deadlines & Obligations Engine; produced full PRD and system architecture documentation.

Tarang (RippleIQ) – AI-Powered Decision Intelligence Platform for E-commerce | [GitHub](#)

React, Tailwind CSS, Recharts, FastAPI, Scikit-learn, XGBoost, Pandas, PostgreSQL

- Built a decision intelligence platform that simulates the ripple effects of business decisions (price, inventory, marketing spend) on sales, revenue, delivery performance, and customer satisfaction before implementation.
- Implemented dependency and causality mapping using ML-driven scenario simulation to surface hidden relationships between business variables.
- Developed risk and consequence detection to flag potential inventory shortages, delivery delays, and rating declines ahead of time, alongside a what-if simulator and revenue/sales forecasting.
- Designed an interactive business dashboard (React + Recharts) translating model outputs into strategic recommendations for decision-makers.

SEHAI – AI-Powered Voice Assistant for Rural Healthcare | [GitHub](#)

React.js, TypeScript, Tailwind CSS, Vite, React Router, XGBoost, Python

- Developed a voice-enabled healthcare platform to assist ANMs (Auxiliary Nurse Midwives) in recording patient symptoms and managing rural healthcare workflows.
- Integrated an XGBoost classifier trained on symptom data to predict probable diseases, enabling early diagnosis support for frontline healthcare workers in low-resource rural settings.
- Designed an AI-assisted triage and referral system enabling seamless escalation of cases from Sub-Centres/ANMs → PHCs (Primary Health Centres) → CHCs (Community Health Centres).
- Implemented multilingual symptom-reporting workflows to improve accessibility for healthcare workers and patients across diverse linguistic regions.

LEADERSHIP & EXTRACURRICULARS

Senior Coordinator – LearnIT (Technical Club)

May 2025 – May 2026

- Organized and coordinated hackathons, technical workshops, and coding events to promote technical learning and innovation among students.
- Mentored 10+ junior members in programming, web development, and project-building, helping them improve their technical skills.
- Led cross-functional teams in planning and executing club initiatives, ensuring smooth event operations and participant engagement.
- Collaborated with student leaders and faculty to increase participation in technical activities and foster a strong developer community.
- Assisted in onboarding new members and creating learning resources for technology-focused sessions.

EDUCATION

B.Tech in Computer Science and Engineering

Manipal University Jaipur

Expected 2028
